Subject: RE: HQ request - short turnaround for ECOS - due to XA 3/5 COB
Date: Thursday, March 05, 2015 10:31:03 AM

Thanks Gary. One of the e-mails mentioned that we may need to use a different format, but we have not received that yet. We will re-format later if needed. CAS

Subject: FW: HQ request - short turnaround for ECOS - due to XA 3/5 COB
Importance: High

Gary/Raji,
Please check the information for the San Jacinto and South Cavalcade sites and see if we need to update the information. Thanks CAS

**Subject:** HQ request - short turnaround for ECOS - due to XA 3/5 COB

You may recall we did issue papers for HQ last month for National Governors/Western Governors/ECOS. They requested them so early that there may be changes by now for the March ECOS meeting. HQ Adm's office has asked the regions to do a quick review of her notes. Please read through these and let me know if any should be deleted, revised or add new one. You can see the format – VERY SHORT. This is how the Administrator wants the information. If you have new ones, please use the attached format. HQ wants revisions Monday March 8; therefore, I need to have your revisions Thursday COB.

Please note HQ wants only the hottest issues that might come up in the meeting with State Secretaries.

Thank you so much for helping me out with this short deadline.

Carmen

EXAMPLES OF FORMAT and BREVITY:

**ARKANSAS** (Director Becky Keogh)

- **Georgia Pacific Crossett facility, Crossett, AR:** Crossett, Arkansas, has a population of about 5,500 residents and is located in southeastern Arkansas just nine miles north of the state's border with Louisiana. Residents from one of Crossett's predominantly African-American neighborhoods have complained for many years about air emissions and water discharges from the Georgia-Pacific LLC paper facility (GP). The facility complex includes a paper mill, plywood mill (currently inactive), and two chemical plants. EPA's National Enforcement Investigation Center (NEIC) is conducting a multimedia investigation, including sampling, for a two week period (February 2-13, 2015) at the Georgia Pacific Crossett facility(ies).

**TEXAS** (Commissioner Bryan Shaw)

- **City of Houston's violations due to Exceedances of Permit Limits and Sewer System Overflows (SSOs):** EPA and the State of Texas attempted to address the issues by administrative actions requiring the City to correct the violations. The City of Houston continued to violate significantly. In 2010, EPA referred the case to the DOJ for civil/judicial action. To date, EPA/DOJ

are still in negotiations with the City to require it to address the violations.

Sincerely,

Carmen Assunto
